

About Schedule Updates

The Schedule Watch Update is PC-compatible only.

Schedule Watch updates are available for all major sports, NFL, MLB, NHL, NBA, NASCAR and College Football and Basketball. New schedules are available each year, about 3-4 weeks before the start of the season.

Sport	Schedule Update Available
NFL Football	Mid-Late July
MLB Baseball	Early February
NASCAR	Early February
NHL Hockey	Mid September
NBA Basketball	Mid September
College Football	Late July * GLOBAL ONLY
College Basketball	Mid January * GLOBAL ONLY

Purchasing a Schedule Watch Update

To purchase your schedule online, go to <http://www.gametimeshop.com> and click "Get New Schedules" link at the top of the page.

Checking the Version

You should first determine the type of Schedule Watch you have. On the back of the watch, you should see markings similar to this photo. If your watch does not say "GLOBAL SCHEDULE WATCH", you have the STANDARD version. *The GLOBAL version is required for College Schedules.*

Be sure to select the Update that matches your watch.

Once you have found the schedule you want, look for the **Add to Cart** button. You will only need to add one item to update your watch, but you can purchase and download other schedules if you'd like.

You can also continue to shop for watches, or proceed to Checkout at this time. When you check out, you may receive a warning message like this:

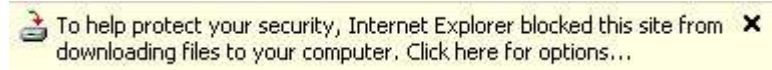

Please click YES on this warning message. It will allow you to proceed through check out securely.

When your check out is complete, your final order page will contain a download link. Just look for this button.

Click the button. You may see a message like this pop up at the top of your browser window.

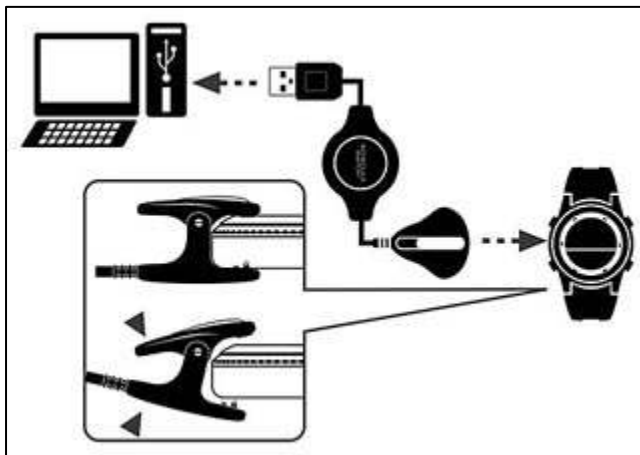

Click this message and select "DOWNLOAD FILE". Be sure you allow this window to appear, as some pop-up blocker software may interfere.

The file you are downloading is an executable (.exe) file. Some windows protection or anti-virus software may also interfere with the download. Be sure the download is permitted and if necessary, disable your anti-virus software.

Click SAVE. Be sure to save the file to a location on your computer (we recommend saving the file to your Desktop).

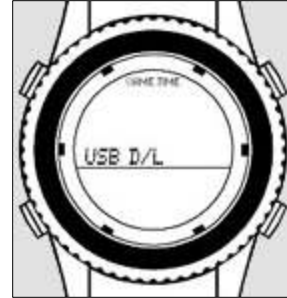

Updating Your Watch

Using the supplied USB cable, connect the USB end to any USB port on your PC. The other end (clip) connects to the watch. Make sure the 5 gold prongs on the clip connect with the 5 terminals on the back of the watch.

When plugged in, the watch will read "USB D/L".

Locate the file you have downloaded. It will be an EXE file, which you can double-click to open.

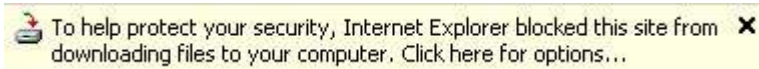

Once the program opens, select your team and click the "DOWNLOAD" button. This process will take only 10-15 seconds, during which your watch will read "UP DATE". Once completed, the program will state "Download Complete". You may now disconnect your watch from the USB Clip.

Redeeming a Free Update Coupon

Go to <http://schedulewatch.com/>.

Enter your Coupon Code in the space provided. Your code must be 9 characters long, and can only be letters and numbers. Click the GO button, which is enabled when a 9-character code has been entered.

Next, select your version, (see "Checking the Version" on Page 1), and select your schedule. Click the CONTINUE button. Your download will start automatically, but you may see a message like this pop up at the top of your browser window.

Click this message and select "DOWNLOAD FILE". Be sure you allow this window to appear, as some pop-up blocker software may interfere.

The file you are downloading in an executable (.exe) file. Some windows protection or anti-virus software may also interfere with the download. Be sure the download is permitted and if necessary, disable your anti-virus software.

Click **SAVE**. Be sure to save the file to a location on your computer (we recommend saving the file to your Desktop).

Frequently Asked Questions

Q: How do I know if I have a GLOBAL Schedule Watch?

A: Check the back of the watch. You should see markings similar to this photo. If your watch does not say "GLOBAL SCHEDULE WATCH", you have the STANDARD version. *The GLOBAL version is required for College Schedules.* **Be sure to select the Update that matches your watch.**

Q: Which schedules can I put on my watch?

A: Any sport's schedule can be put on your watch. Even if you purchased an MLB watch, you can update it with the NBA, NHL, NASCAR or NFL schedules quickly and easily!

Note: GLOBAL Schedule Watch is required for Collegiate Schedules.

Q: How often can I update my watch?

A: As often as you like. You can for example, keep the MLB schedule on your watch until NFL season starts, and update it with the NFL schedule. Remember, each schedule update works once. When you update your schedule, you over-write the previous schedule.

Q: Are playoff schedules available?

A: Not at this time. Since playoffs are only scheduled up to a few games in advance, updates are not practical given the current technology.

Q: The game times are off by 1 or 2 hours.

A: Check that you have the correct time zone selected. To change it, press and hold the ADJUST button (top left) on the watch for 3 seconds. Press the SELECT button to scroll through the options until it reads ZONE. Press the FORWARD and BACK buttons until your time zone code is displayed (ex: EST = Eastern Standard Time)

Q: I don't recognize the fight song in my college schedule.

A: School fight songs in the collegiate schedules are made based on what is considered the "official fight song" by the university. This is not necessarily the same song that fans may recognize. Sometimes there are also many variations of the song. If you feel a change should be made, compose an email to [The Webmaster](#).

Q: I need further support or watch repair.

A: Please contact our Customer Service department by phone, available 8:30am to 5:30pm, weekdays. 845-457-7565.
